A systems upgrade is to be installed on our DCC system today which will give us increased capabilities. It will be necessary for members to reenter consists. Mike Kremheller provided an update on scenery and on plans for the color of ballast. The track layout for the steam facility was discussed. Consideration was given to possible modifications of the track in the Conroe yards.

All members were requested to report any track problems encountered so that they can be corrected before scenery is placed over or around the track. The need for improved lighting was discussed for several areas.

Meeting was adjourned at 11.21 AM.

Respectively submitted,
